Professional Summary

Data Analytics and Machine Learning enthusiast with hands-on experience in Python, SQL, Power BI, and Machine Learning through internships and academic projects. Skilled in data analysis, EDA, dashboard development, business intelligence, and transforming data into actionable insights. Passionate about solving real-world business problems using analytics, visualization, and AI-driven solutions.

SKILLS

Programming: Python, SQL, HTML, CSS

Data Analysis & Visualization: Pandas, NumPy, SQL, Matplotlib, Seaborn, EDA, Power BI

Machine Learning: Linear/Logistic Regression, KNN, Decision Trees, Random Forest, XGBoost, Scikit-learn, Clustering (K-Means), Dimensionality Reduction

Deep Learning: FNN, CNNs, RNNs, PyTorch

Generative AI: Transformers, Tokenization, RAG, NLP, Vector Databases, Embeddings

Frameworks: Flask, FastAPI, Streamlit, Agno, Hugging Face Transformers

Databases: MySQL, PostgreSQL

Tools: Git, GitHub, Jupyter Notebook, VS Code

EDUCATION

MVJ COLLEGE OF ENGINEERING

Dec 2022 – June 2026

Bachelor of Engineering

• GPA: 8.69 / 10

EXPERIENCE

Data Analytics Intern — Dyashin Technosoft

FEB 2026 – MAY 2026

- Performed **EDA, Data Cleaning, Feature Engineering, and Data Preprocessing** using **Python** and **SQL** preparing business-ready datasets and automating data workflows to improve reporting efficiency.
- Built **Interactive Power BI dashboards** and **KPI visualizations**, analyzed **business requirements** and delivered **actionable business insights** to support **data-driven decision-making**

PROJECTS

SmartCart System-Customer Segmentation [Data Analysis+ML+Power BI] [GitHub](#)

- Developed Customer Analytics System using **K-Means** on **10K+** records with **preprocessing, feature engineering, PCA, EDA** and optimized clusters using the **Elbow Method** and **Silhouette Score** to improve customer segmentation.
- Built a **Data Preprocessing & Feature Engineering Pipeline** and applied **Designed interactive Power BI dashboards** featuring **Executive Overview, Customer Segmentation Analysis, and Marketing Insights** to visualize **KPIs** and support **data-driven business decisions**.

SnapClass AI-Attendance System [AIML+Computer Vision] [GitHub](#)

- Developing an **AI-powered attendance management system** using **computer vision, face recognition, and voice recognition** for secure student authentication and automated attendance tracking.
- Built **real-time ML pipelines** for face and voice-based attendance prediction, integrated **SQL database operations and attendance analytics**, and deploying the solution using **Streamlit, Flask, and Vercel**.

Intelligent Sentiment Classifier [DeepLearning + NLP] [GitHub](#)

- Built an end-to-end sentiment analysis pipeline using **TF-IDF + PyTorch RNN** on **10K+ IMDB** reviews with **NLTK preprocessing** (tokenization, stopword removal, stemming)
- Implemented **feature extraction** and **RNN-based sequence modeling** with **padding/truncation**, capturing text patterns to improve performance

Smart YouTube Video Analyzer [GitHub](#)

- Built **Smart YouTube Video Analyzer** leveraging **Agno, Gemini LLM, & YouTube Transcript API** to automate transcript analysis, semantic summarization, & timestamp-based content navigation.
- Deployed an interactive **Streamlit** application implementing **Agentic AI** workflows for real-time video analysis, automated knowledge extraction,& structured content insights.
